

# VMWARE FUSION™ 3

Windows is even better on the Mac.

Now **\$15.00** each  
(minimum 10) until Dec. 31, 2010  
(originally \$29.40)

## Macs in Education with VMware Fusion

VMware Fusion helps education institutions of all sizes get the most out of great Mac hardware. From the classroom, to the lab, and beyond.

### Unlock the power of Macs in Education with VMware Fusion

The Mac has always had a special relationship with the education space. But the unavoidable need for key Windows-applications has made it difficult for the Mac to achieve its true potential in education. With VMware Fusion, Windows apps can run on Mac hardware, seamlessly, unlocking the power of the Mac in Education.

### Students, Teachers, and Administrators Love Macs

Look at the number of iPods, iPhones, and more walking around the halls of your institution. Users love the Mac. But the reality is that users still need to access Outlook, Internet Explorer, Visio, speciality applications included in text books, and many, many more. A Windows virtual machine, running on VMware Fusion on the Mac, provides the best of both worlds.

### iMacs plus VMware Fusion: The Ultimate Lab Setup

The iMac, or any Intel Mac, plus VMware Fusion, can run best of breed Mac OS X and Windows applications, letting your users fully exploit the power of Mac hardware.

From Apple pro apps like Final Cut Pro, to important Windows-only statistical analysis programs, business applications, and development environments like Visual Studio, a Mac with VMware Fusion can run them all, not to mention Linux, Netware, and Solaris.

And the ability to snapshot and roll back virtual machines makes lab re-imaging a snap.

### Education IT Platform of Choice: Only Macs with VMware Fusion Run Mac OS X, Windows, and Linux, seamlessly.

Education IT organizations find themselves needing to support more and varied operating system than most IT organizations. To support Mac OS X, Linux, and Windows look no further than VMware Fusion on an Intel Mac for a development, administration, and support platform to address all the needs of your environment.

VMware Fusion unlocks the true potential of Mac Pros and MacBook Pros as professional-grade IT equipment.

## VMware Fusion Key Features

### Best in Class

VMware Fusion is built on the same industry leading virtualization platform as VMware Infrastructure, Server, Workstation, and so on. The power of VMware virtualization, on a Mac.

Only VMware Fusion offers powerful features like Virtual SMP, 64-bit VM support, and more.

### Cross Compatible

VMware Fusion can run any VMware VM, meaning your Workstation, Server, and ESX VMs will run on VMware Fusion.

### Built for the Mac

Only VMware Fusion provides industry-leading virtualization, built from the ground up for the Mac platform, providing a Mac-friendly, Mac-native user interface that users love.
