**Ohio Technology Consortium**

A Division of the **Ohio Department of Higher Education**

# OARnet Member Meeting

OHECC May 22, 2019

**Paul Schopis**  
Executive Director, OARnet

# OARnet Updates

# OARnet Fiber Project

**Fiber RFP was released in July, 2018 to replace expiring IRU routes.**

- Level3 routes were previously renewed through 2031
- OARnet met with all vendors for clarification and questions
  - **Final pricing requested on selected route; negotiations on going**
  - Anticipate first round of awards will be for Ring 4 – earliest IRU expiration

# Innovation Districts

**Innovation Districts.** HB233 authorizes cities and villages to create “Downtown Redevelopment Districts” (DRDs) for innovation districts and/or historic rehabilitation.

**Canton, OH.** Canton is the first Ohio city to establish an Innovation District.

- City is working with Agile, the Hall of Fame (NFL), and several other companies. **Connection established. Met with City and Senator Schuring to map out next phase**
- **Fairlawn seeking similar arrangement with City of Akron**

# Connect to Amazon Web Services

OARnet provides the following types of connectivity to Amazon Web Services (AWS):

## Peering

The OARnet/AWS 40Gbps public peering in Ohio provides customers with a high-speed, low latency path to us-east-2 public Internet facing services including site-to-site VPN connections.

Available to all members

## Direct Connect

A dedicated Direct Connect port enables the extension of a customer's AWS VPC environment to their campus networks through OARnet. This private connection can reduce latency and increase throughput to AWS services.

Case Western, Miami, and Ohio State all connected at 10G

## Hosted Virtual Interface (VIF)

OARnet offers a shared, Hosted VIF providing all of the features of the Direct Connect with the flexibility to choose the subscription level that meets customer networking and IT requirements.

Kenyon and OSC in process

# Research Opportunities

- **NSF 19-533:** waiting to hear from NSF
  - Category I: Co-PI with Kent State
    - Update NSF asked clarifying questions
  - Category II: PI
    - Capital University
    - Mount Union
    - Tiffin
- **NSF 19-537:** not selected for full proposal
  - Midscale Infrastructure Co-PI
    - Case Western

A close-up photograph of a person's hand holding a silver smartphone. The hand is positioned in the upper left quadrant of the frame. The background is heavily blurred, showing the back of a person's head and shoulders, suggesting an office or meeting environment. A dark horizontal band across the middle of the image contains the text "Financial Updates" in a bright teal color. At the bottom of the image, a tablet device is partially visible, resting on a wooden surface.

# Financial Updates

# FY20 Fee Model Changes

**To ensure that member institutions continue to have access to affordable network services, we have developed a more sustainable fee model that will take effect July 1, 2019.**

This model was developed over many months through a series of thoughtful and collaborative discussions among representatives of higher education member institutions and the DHE-CIO Advisory Board's Business & Finance Subcommittee.

# Fee Model Components

## What's Changing? – Beginning July 1, 2019

### 1 Port Fee (New)

- Low fee for all dedicated ports into an OARnet backbone port
- Includes CPE up to 40 Gig

### 2 Membership Fee (Modified)

- Includes ports via collector circuits and includes CPE
- Covers IntraOhio traffic
- Value-added services (examples below)

### 3 Commodity Internet Fee (Reduced)

- Reduced fee with no structural changes to services
- Includes DDoS mitigation

### 4 Content Fee (Unchanged)

- No structural changes

Please note that these fees do not include last-mile connectivity costs, which remain the responsibility of the customer.

# FY20 Fees

## Port Fee

Port Size	FY19	FY20
Collector (per Mb)	\$ —	\$ —
1 Gig - Dedicated	\$ —	\$ 200
10 Gig - Dedicated	\$ —	\$ 400
40 Gig - Dedicated	\$ —	\$ 900
100 Gig - Dedicated	\$ —	\$ 1800

## Membership Fee

Type per FTE	FY19	FY20
Public & Private	\$ 1.35	\$ 1.00
Community & Technical	\$ 0.45	\$ 0.77

## Commodity Internet Fee

Min (Mb)	Max (Mb)	FY19	FY20
0	999	\$ 3.60	\$ 2.20
1,000	2,999	\$ 2.60	\$ 2.00
3,000	9,999	\$ 1.90	\$ 1.80
10,000	Beyond	\$ 1.65	\$ 1.60

## Content Fee

Type	FY19	FY20
Per Mb, per month	\$ 1.00	\$ 1.00

# Credit Program

**As a result of implementing the new fee model, some schools will be adversely impacted. OARnet will review impact based on subscriptions as of July 1, 2019.**

FY2020 Credit	FY2021 Credit
70% of Net Increase*	40% of Net Increase*

*\*Net Increase: Increased costs as a result of applying new fee model to current subscriptions.*

# Security and Compliance

## Threats, vulnerabilities, and attacks are on the rise

- Compliance requirements continue to expand

## Current operations meet stringent NIST-based security requirements

- Currently undergoing regularly-scheduled IT controls assessment with OSU Internal Audit

**Proactively engaging with trusted third-party experts to identify and remediate any potential areas of emerging risk to the organization**

# Ohio Cyber Range

**An activity of the Ohio Cyber Collaboration Committee (OC3)**

**University of Cincinnati** is the first Core Site for the OCR. **University of Akron** has been selected as the second Core site.

- Future phases will add Regional Programming Centers throughout the State.
- Production capability announced for **Fall Term 2019**
- All sites connect through OARnet.

An aerial photograph of a city at dusk, with the River Thames visible in the center. The city is illuminated by warm lights, and the sky is a mix of orange and blue. Overlaid on the image is a network diagram consisting of white lines connecting various points. Some of these points are represented by glowing white location pin icons, while others are simple white dots. The network spans across the city, with a central hub-like structure. The text "Looking Ahead" is written in a bold, teal font across the lower middle of the image.

# Looking Ahead

# State of OARnet:

## Opportunities and Challenges

- Financial horizon looks secure; budget is balanced and reserves will cover IRU renewals.
- Much more integrated with state initiatives
  - Chancellor is on Governor's Cabinet
  - Backbone for State
  - Much wider constituent base
- Completely reliant on State for all Capital Equipment funding
- Direct Operating Subsidy is slight less than flat; however indirect OS is increasing but discretionary

# State of OARnet: Path Forward

- ODHE will appoint Interim Executive Director for 6-12 months
- In parallel, ODHE will commence search for new permanent Executive Director
- Community engagement in selection process

Cloud  
**RULES**  
...and what matters

Moving to the cloud: real  
experiences along the way

# Getting Started: What are your strategic drivers for the cloud?

ENGINE  
START

# Miami University

## **Cloud Appropriate**

Viabile, current datacenter  
Strong focus on Agile  
methodologies for developing  
and supporting solutions

# Notre Dame

## **CloudFirst**

Full datacenter move from a  
dying datacenter  
Re-designed organization  
around cloud operations

Cloud

**RULES**

...and what matters

# Three rules of cloud infrastructure moves

#1

# No Forklifting

(or...only intentional, planned  
forklifting)

# #2

## *Reduce/Reuse/Recycle*

PHP

C++

Perl

R

Ruby

JS

Python

# #3

**Financial engineering is as important as  
technical engineering**

A close-up photograph of a bronze statue's hand, with the palm facing the viewer and five fingers spread. The hand is part of a larger statue, with a portion of the arm and shoulder visible on the right. The background is dark and out of focus, showing some blurred circular lights. The text "Five things that matter" is overlaid in white, sans-serif font across the center of the hand.

Five things that matter

Latency matters

# Routes matter

**OARnet**

An **OH·TECH** Consortium Member

Which is why OARNet  
matters for us...

# Good code matters

(and bad code can't be hidden as easily by low latency and extra horsepower)

# Redundancy matters

A world map showing various cloud provider regions. Regions are marked with colored dots and labels: North America (Oregon, N. California, West US, South Central US, East US, East US 2, S. Gov Virginia, N. Virginia, North Central US, Canada Central, Canada East, US Gov Iowa, Central US, Central US 2), Europe (UK West, West Europe, North Europe, UK South, Ireland), Asia (China North, Beijing, Seoul, Japan East, Tokyo, Japan West, China East, South India, West India, Central India, South India, Singapore, Southeast Asia), and Australia (Australia East, Sydney, Australia Southeast).

# Why?

# Your datacenter is no longer a single location (or region!)

Atomia

# Enabling Multi-cloud matters

LAND

A person wearing a purple jacket and an orange beanie is spraying water from a green fire hydrant. The water is spraying out in a large, powerful jet, creating a misty spray. The person's hand is on the green cap of the hydrant. The background is a blurred city street with buildings and a sidewalk.

**Bandwidth  
matters...in  
specific ways**

Change management matters

Changing habits matters

# The cloud future

# The old datacenter: What remains onsite?

The new datacenter is:  
Sometimes **on**, often **off**,  
always **scalable**?

And then you have to deal with some things that  
don't handle this well at all

Intramural Events & Viewing Parties

January 2018

- Akron Esports Arena (*Varsity*)
  - Located in Infocision Stadium
  - 22 PCs for varsity practice/competition
  - 9 ft wide hyper wall display
  - Seating for 50
  - Broadcast Studio
- Zips Esports Center (*Hybrid*)
  - Located in the Student Union
  - 22 PCs for varsity practice/competition
  - 24 PCs for club practice/competition & recreational gaming
  - 10 console stations
  - Viewing lounge /w 86" HD TV
- Zips Gaming Center (*Recreational Only*)
  - Located in the Williams Honors College
  - 24 PCs for recreational gaming
  - 5 console stations

## Varsity Esports

- 44 players on 5 Teams
  - League of Legends (10 players, 5 to a squad)
  - CSGO (10 players, 5 to a squad)
  - Overwatch (12 players, 6 to a squad)
  - Rocket League (6 players, 3 to a squad)
  - Hearthstone (6 players, 3 to a squad)
- Scholarships
  - +\$1,000 scholarships for student-players
  - \$2,500 scholarships for student-managers
  - \$5,000 scholarships for student-coaches
- 10-15 hour time commitment
  - 9 hours of practices, scrimmages, & VOD review
  - 1 competition per week
  - 1 hour of yoga
  - 2 hours of strength & conditioning training
- 2.5 Minimum GPA
- Enrolled in UA Collegiate Success Program
  - Mandatory study tables for freshman & transfer students
  - Regular meetings with a tutor-mentor
  - Progress reports from professors

## Club Esports

**Club Weekly Meeting Schedule**

Fortnite 5-7pm  
SMITE 7-9PM

**Friday**  
RocketLeague 5-8pm

- Over 700 students involved in 14 newly formed RSOs
- Provides facilities, equipment, & organization for a much wider variety of games.
- Allows all skill levels & clubs for casual play.
- Serves as a training ground for aspiring varsity players
- Incubator for future potential varsity games
- Helps connect students of similar interests
- Many students serve in leadership roles on campus for the very first time.
- Each Club required to host one event that is open to the public in order to reserve facilities for club use.

## Zips Gaming

- Creating a physical space to develop an on-campus, in-person gaming community.
  - Encouraging students to contribute to the social capital of the campus community.
- Help students develop healthy habits around gaming, timing management, & academics.
- Eliminate financial barriers to participation for low-income students
- Students get 90 free hours in the gaming facilities
- Allows for monitoring and implementation of intervention protocols for overuse
  - Staff Check-In
  - Obtain Academic Progress Report
  - Consult with Counseling Service

## Zips Esports Network

*Young people with passion have been the driving force behind making Esports mainstream for the past 3 decades.*

- Student assistantships and internships available for students in a variety of essential esports industry roles.
  - Creative Director
  - Community Manager
  - Executive Producer
  - Technical Director
  - Graphic Designer
  - Motion Graphics Artist
  - Commentator
  - Video Editor
  - Photographer
  - Application Developer
- Creating a modern cross-disciplinary team of agile specialists to provide valuable experiential learning opportunities in an entrepreneurial context for students to:
  - Promote, plan, execute, & broadcast all varsity competitions & club events.
  - Program digital solutions for program and club pain points.
  - Propose sponsorships and participate in business development.
  - Create video and graphic content to highlight student successes.

## Partnerships

### Academic

- There is much to learn about esports and much that the future workforce of the esports industry could be educated on in order to get ahead of the competition.
- This includes all the fields that relate to sports and more such as
  - Psychology, Medicine, Health & Wellness, Business, Marketing, Coaching, Communication, Broadcasting, Graphic Design, Game Design, Event Production, & much more
- Efforts to provide these research and instructional opportunities to UA students within the first year include:
  - School of Communication puts first Esports Broadcasting course on the books
  - Counseling Psychology Doctoral Students Conduct practicum research with varsity players
  - Sports Science & Wellness Education Faculty conduct research on physical activity as it relates to the mental toughness of esports athletes

### Sponsorship

- Males & females between the ages of 18-25 report spending the same average time watching esports content as conventional sports content. (Limelight Networks, 2017)
- As collegiate esports garner increased viewership there are a variety of endemic and non-endemic businesses that are interested in contributing funds or equipment in exchange for visibility among this demographic.
- Efforts to obtain equipment and financial contributions for the Zips Esports program in the first year include:
  - Audiotechnica, SteelSeries, Gravity Gaming, Archon Clothing, & the Cleveland Clinic.
  - Total contributions valued at over \$100,000.

# Location Location Location...

- Facility is a repurposed building that UMU acquired two years ago
  - 2500 approx. sq ft for esports
  - Renovated spring 2019 (almost 100% complete)
  - Includes two staff offices and “coaching room”
- Connection
  - 1G connection to campus network including campus WiFi
  - Coming soon:
    - 10G direct connection to OARnet via Spectrum with 1G of commodity bandwidth
      - This circuit will also be utilized for a backup of the campus primary circuit

Club/Student  
Engagement Area

Varsity Stage

Console Gaming  
Area

Etching

# Equipment:

- 20 varsity machines
  - 12 for matches, 6 located in coaching room, 2 spares
- TBD club/student engagement (initial talks indicate 10)
  - Remaining locations are wired for students to bring laptops
- Equipment procured from iBUYPOWER, BenQ, and CDW
- Nintendo, Microsoft, and Sony will be represented in the console gaming area.

# Forecast, aka we hope this happens...

- Grow esports to 20-30 students by 2020
- Realize ROI in 3-4 years
- Evolve/Relocate facility
- Add an additional esports staff member in year 2
- Sponsorships
